German, Swedish, Finnish-Joint training course 2019

- What is the ESD Panel ? - ESDP News and documents of interest -

Date de mise en ligne : lundi 13 mai 2019
5 weeks of practical training

2 weeks of theory E-learning (generally we have 5 weeks in between the practical course parts) outside the course and some additional during the practical training

Prerequisites before entering the course:

- Academic background - PhD level PhD student (postdocs and masters were also accepted)
- Pool life guard
- CPR and first aid
- Medical examination
- Dive certificate at least PADI rescue or CMAS**
- Documented dry suit training
- At least 30h of diving

Joint examination, one week

- Before examination participants must have at least 50h or 70 dives and at least 5 dives below 25 meters of depth
- German examination committee: Kommission for Forschung Taucher for the German examination - FT certificate
- Swedish examination committee: One of the three by the naval forces approved diver schools in Sweden (Fire department school in Stockholm) for the Swedish S30 certificate and SSD. Certificates are issued by the Swedish naval forces head quarters

Both these certificates are equivalent to the training standards stated in the ESD standards. In Swedish work diving regulations it is stated that the ESD standards should be recognized at the same standards as the Swedish S30.
